

## CONTENTS OF VOLUME 293

Number 1, November 1, 2005

<b>The finite quasi-Baer property</b>	<b>1</b>
Ulrich Albrecht, Simion Breaz, and William Wickless	
<b>The varieties of quasigroups of Bol–Moufang type: An equational reasoning approach</b>	<b>17</b>
J.D. Phillips and Petr Vojtěchovský	
<b>Thin Lie algebras with diamonds of finite and infinite type</b>	<b>34</b>
Marina Avitabile and Sandro Mattarei	
<b>Geometric crystals on unipotent groups and generalized Young tableaux</b>	<b>65</b>
Toshiki Nakashima	
<b>Bilinear forms on Frobenius algebras</b>	<b>89</b>
Will Murray	
<b>Hilbert schemes and noncommutative deformations of type A Kleinian singularities</b>	<b>102</b>
Ian M. Musson	
<b>On lifting commutative dynamical systems</b>	<b>130</b>
Ghassan Sarkis	
<b>Colength sequences for Kemer algebras</b>	<b>155</b>
Allan Berele	
<b>Orbits of automorphism groups of fields</b>	<b>167</b>
Kiran S. Kedlaya and Bjorn Poonen	
<b>The non-coprime <math>k(GV)</math> problem</b>	<b>185</b>
Robert M. Guralnick and Pham Huu Tiep	
<b>Central ideals and Cartan invariants of symmetric algebras</b>	<b>243</b>
László Héthelyi, Erzsébet Horváth, Burkhard Külshammer, and John Murray	
<b>Groups covered by conjugates of proper subgroups</b>	<b>261</b>
Giovanni Cutolo, Howard Smith, and James Wiegold	
<b>On totally permutable products of finite groups</b>	<b>269</b>
A. Ballester-Bolínches, John Cossey, and R. Esteban-Romero	
<b>Twisted Frobenius–Schur indicators of finite symplectic groups</b>	<b>279</b>
C. Ryan Vinroot	
<b>The Galois algebra with Galois group which is the automorphism group</b>	<b>312</b>
George Szeto and Lianying Xue	

Number 2, November 15, 2005

<b>The Leavitt path algebra of a graph</b>	<b>319</b>
Gene Abrams and Gonzalo Aranda Pino	

<b>Higher Koszul algebras and <math>A</math>-infinity algebras</b>	<b>335</b>
Ji-Wei He and Di-Ming Lu	
<b>A non-vanishing theorem for <math>\mathbb{Q}</math>-divisors on surfaces</b>	<b>363</b>
Jungkai Alfred Chen, Meng Chen, and De-Qi Zhang	
<b>Valuations on tensor powers of a division algebra</b>	<b>385</b>
Patrick J. Morandi and B.A. Sethuraman	
<b>Fields defined by locally nilpotent derivations and monomials</b>	<b>395</b>
Shigeru Kuroda	
<b>Extended plus closure and colon-capturing</b>	<b>407</b>
Raymond C. Heitmann	
<b>Kummer theory for norm algebraic tori</b>	<b>427</b>
Masanari Kida	
<b>Absolute-valued algebras with involution, and infinite-dimensional Terekhin's trigonometric algebras</b>	<b>448</b>
Julio Becerra Guerrero and Ángel Rodríguez Palacios	
<b>Hereditary coalgebras and representations of species</b>	<b>457</b>
Justyna Kosakowska and Daniel Simson	
<b>A local–global theorem on periodic maps</b>	<b>506</b>
Zhi-Wei Sun	
<b>Cones of curves and of line bundles “at infinity”</b>	<b>513</b>
Antonio Campillo, Olivier Piltant, and Ana J. Reguera	
<b>Polyhedrality of the Brookes–Groves invariant for the non-commutative torus</b>	<b>543</b>
Simon Wadsley	
<b>When is length a length function?</b>	<b>561</b>
Gabriel Picavet and Martine Picavet-L’Hermitte	
<b>Irreducible polynomials and full elasticity in rings of integer-valued polynomials</b>	<b>595</b>
Scott T. Chapman and Barbara A. McClain	
<b>On extensions of generalized Steinberg representations</b>	<b>611</b>
Sascha Orlik	
<b><i>Author index for volume 293</i></b>	<b>631</b>
